

Year 7 Assessment & Homework Overview

This booklet sets out the assessment and homework schedule for each of the subjects taught in Year 7. It gives an overview of each half-term and the type of assessment and homework that could be set. The schedule is regularly reviewed and subject to change. In each subject area, students are formally assessed a minimum of three times over the school year, after which they will undertake a formal review and feedback process in each subject area. As well as the formal assessments, students will be provided with regular feedback in lessons, known as live marking, as well as undertaking peer and self-assessment tasks.

In Year 7 students have one lesson of Art per week. Students are set one piece of homework each half term at least; students may receive a second piece, depending on teacher and project progress. This either requires them to learn some Art spellings, complete a practical task or research some information about the current artist or movement they are studying.

Year 7 students have one lesson of Dance per week and are provided a knowledge organiser each half term and will complete a quiz in the final week of the term.

Year 7 students have three lessons of Design Technology per fortnight, split between Graphics, Resistant Materials and Textiles with two homework's being set each half-term.

In Year 7 students have one lesson of Drama per week. Students are set two pieces of homework each half term. This either requires them to learn some Drama spellings or learn some information about the current area they are studying from a knowledge organiser. They are tested on the spellings or complete a quiz on the context they were asked to learn in one of their lessons.

In Years 7 students have three lessons of English per week. They will have one literacy-based homework per fortnight and one reading organiser-based homework. The knowledge organiser homework is based on students learning the key words, facts information assigned by their teacher. They will have a quiz to assess their progress. The literacy will be self-assessed.

In Year 7 students will undertake Food Studies for the entire academic year. They will have **one** food lesson a fortnight. These lessons will alternate throughout the year, one being a theory lesson and one being a practical cooking lesson. Learners will be given a homework task each lesson. On the days that students have theory lessons, their homework will be a task to prepare them for the practical lesson. Students will be expected to watch the demonstration video so that they will have a clear understanding of the practical task. Some videos will also link to a quick quiz to check their understanding. They will also be expected to bring in their container and ingredients for their practical lesson. On the days that students have practical lessons, their homework will be to complete an evaluation of the food product that they prepared that day. We strongly recommend that the students get feedback from other people about their product as well. Students will also be expected to complete a very short research task in order to aid their learning within the next theory lesson.

In year 7 students have two lessons of Geography per week, they supplement their learning through independent research at home, online Google assessments, essay writing and revision. Homework should be set approximately every 4-6 lessons, depending on the complexity of the topic being studied.

In Years 7 students have two lessons of History a week. Year 7 are set homework every half term. This homework is based upon using a knowledge organiser to learn key facts, to be able to answer a set of quiz questions at the start of every lesson. This will be peer assessed. Students will also supplement their learning through independent research at home, online Google assessments, essay writing and revision.

In Years 7 students have two lessons of ICT over a two-week timetable. They are set homework twice every half term. Students complete a knowledge organiser of the key facts, terminology to be able to complete an end of topic assessment or project assessment at the end of every topic. Topics last one-half term (6-7 weeks). The assessments are marked by the classroom teacher.

In Year 7 students have three lessons on Maths per week. Homework is set through Sparx, this links to our scheme of work and sets differentiated homework to each student once a week for between 30 minutes and one hour. The homework consists of 60% of the work students are currently completing and 40% on work students have completed previously that year/during their course. This is based on their previous homework's and topics they may have struggled on. Each week following completion of the homework staff use up to five insights provided by Sparx to feedback on homework and support with topics the class struggled with.

In MFL (French and Spanish) students are taught one lesson per week in each language. They are set one 30-minute homework per week. This may be made up of more than one task, from a range of activities such as reading exercise, vocabulary learning, watching a short video, research.

In Year students have one lesson of Music per week. No homework is set for KS3 Music.

In Years 7 students have two lessons of Philosophy, Religion and Ethics (PRE) a fortnight. They are set homework every lesson. This homework is based upon using a knowledge organiser to learn key facts, to be able to answer a set of quiz questions at the start of every lesson. This is peer-assessed every lesson.

In Year 7 students have six lessons of Science per fortnight, split between two teachers. Homework will be set for three times per topic by each of their teachers. This equates to averaging one piece of homework for science per week. For two of the three homeworks per topic, students will be set knowledge retrieval homework, accompanied by a low stakes test in lesson. They will be required to learn key terms and definitions that are given to them on a knowledge organiser and recall them in lessons. This will be peer and self-assessed at the start of a lesson. The last homework per topic will be students revising for their end of topic assessment.

Autumn Half-Term 1

Subject	Assessment	Homework
Art	Baseline unguided tonal drawing of a shoe	Research Jason Vincent Scarpace
Dance		Knowledge organiser
Design Technology	Graphics: Design section which looks at creativity and analysis Resistant Materials: ACCESSFM - Product analysis task	Graphics: 1. Final design action figure idea. In booklet. 2. Packaging symbols in booklet. Resistant Materials Product analysis - with material properties focus
Drama	The Missing Person Written Assessment	1. Knowledge Organiser Quiz 2. Spelling Test
English	Reading and Spelling Ages	One literacy-based homework and one reading organiser-based homework per fortnight
Food Studies	Baseline Assessment	On the days that students have theory lessons, their homework will be a task to prepare them for the practical lesson. On the days that students have practical lessons, their homework will be to complete an evaluation of the food product that they prepared that day.
